

## Trap Line Adventure FAQ's

### **What will I do during the [Trap Line Adventure](#)?**

You will assist a qualified trapper and hunting guide in all aspects of trapping. This includes setting and baiting of the traps as well as checking and retrieving the animals. We set several types of traps including leg hold, snares and connibears on land, slews and in the water. This experience will give you great knowledge and appreciation of the sport.

### **What animals will we be trapping?**

Our primary targeted species are marten, mink, fisher, wolf, beaver, muskrat, lynx and wolverine. On occasion we will also find the following species, Skunk, Squirrel, River Otter and Fox.

### **What mode of transportation?**

The main mode of transportation is done by 4x4 truck and by snow machine. If someone is not comfortable on a snow machine then we can conduct the whole trap line adventure by truck and foot.

**What can I add to the Trap Line Adventure?**

For a better chance of harvesting a lynx we recommend you upgrade to a lynx hunt with hounds. It is also recommended that you purchase a wolf tag, as we have had success in the past.
